11th August, 1970.

REFERENCE: 2184/70 EW/TY

Dear Sir,

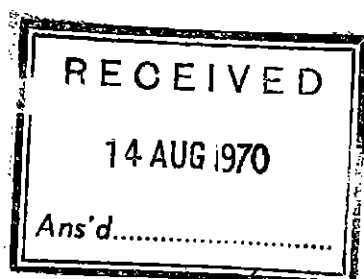

I have to advise for your information in connection with your position as Joint Consultants for the preparation of a Strategic Master Plan for the City of Sydney, that the Council at its meeting held on the 13th July, 1970, resolved as follows :-

"That the letter dated the 19th June, 1970, from the Town Clerk, The Council of the Municipality of Willoughby, seeking this Council's support in respect of a motion to be considered at the 1970 Local Government Association Conference relating to a proposal for the establishment of a modern transport terminal at a centrally located site in the inner City area, and in making appropriate representations in this regard to the State Member for Parliament for this Council's area, be received, and that -

The Council of the Municipality of Willoughby be advised that Council would appreciate any further details with regard to any specific site or sites which might have been considered in connection with the proposal, and in this regard it be pointed out to the Council that an Action Plan for Railway Square arising from the Strategic Master Plan for the City of Sydney is expected to incorporate a major transport interchange, and, further, it be indicated that this Council is of the opinion that a cross-City public transport service should be introduced to provide a through service in north-south and east-west directions with a common major interchange station similar to those provided in connection with transport systems of a like nature in operation in many overseas countries, and that this matter should be taken into consideration in connection with the present proposal."

It was also decided that in any future discussions on the matter, consideration be given to the abovementioned views of the Council, and that the Department of Government Transport be advised accordingly.

Yours faithfully,

J. Luscombe
