Sydney, Wednesday, August 20, 1969

No. 3766-50

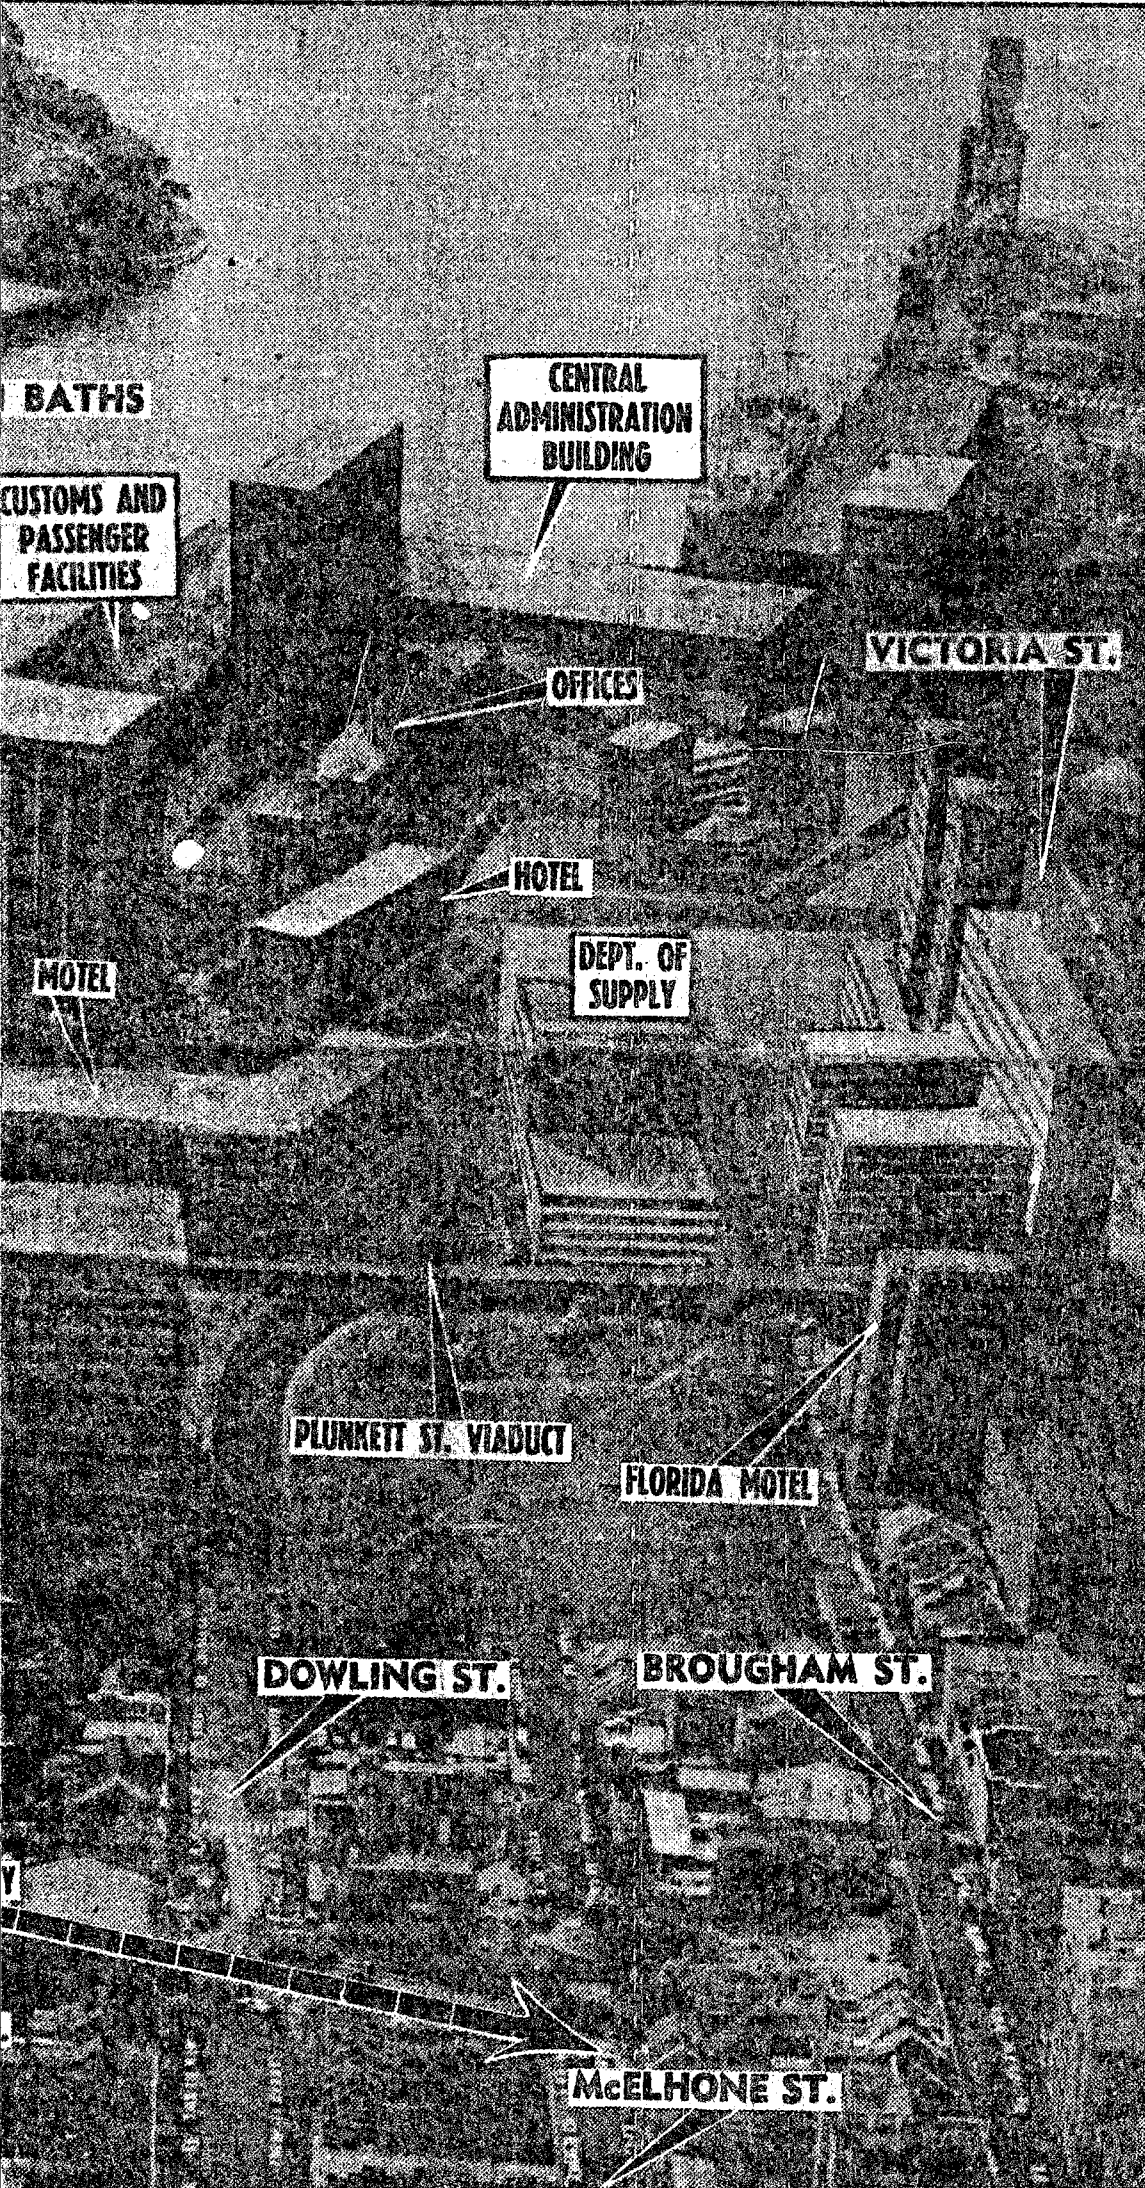

Phone 2-0924

● Finance P 60

● TV P 58

● Weather: Isolated showers.

Weather Bureau details P 70

IT'S OUR CITY

Imagine
catching
the 5.20
copter
home

The high-rise apartment and office blocks will claw at the clouds.

Thirty, forty, fifty storeys—these lofty fingers of steel and concrete will sprout skywards in The Loo of 2000 AD.

Far below, if the planning is right, plazas and parks will bask in the sunlight now shared by dreary tenements and depressed factories.

Peak-hour helicopters will flutter overhead, monorails will speed passengers through the air and expressways will snake their way through a new suburb, carrying new forms of transport.

Yet Mrs MacQuarie's Chair—that idyllic spot touching the place where a penal colony became a thriving city—will still be there.

HOVERCRAFT

The ferries that cruise past today will have given way to hovercraft—or another of man's inventions.

This is Woolloomooloo 2000 AD—a suburb that will have risen out of the doldrums to become a grand gateway to a city of six million people.

What will life be like for the Sydneysider?

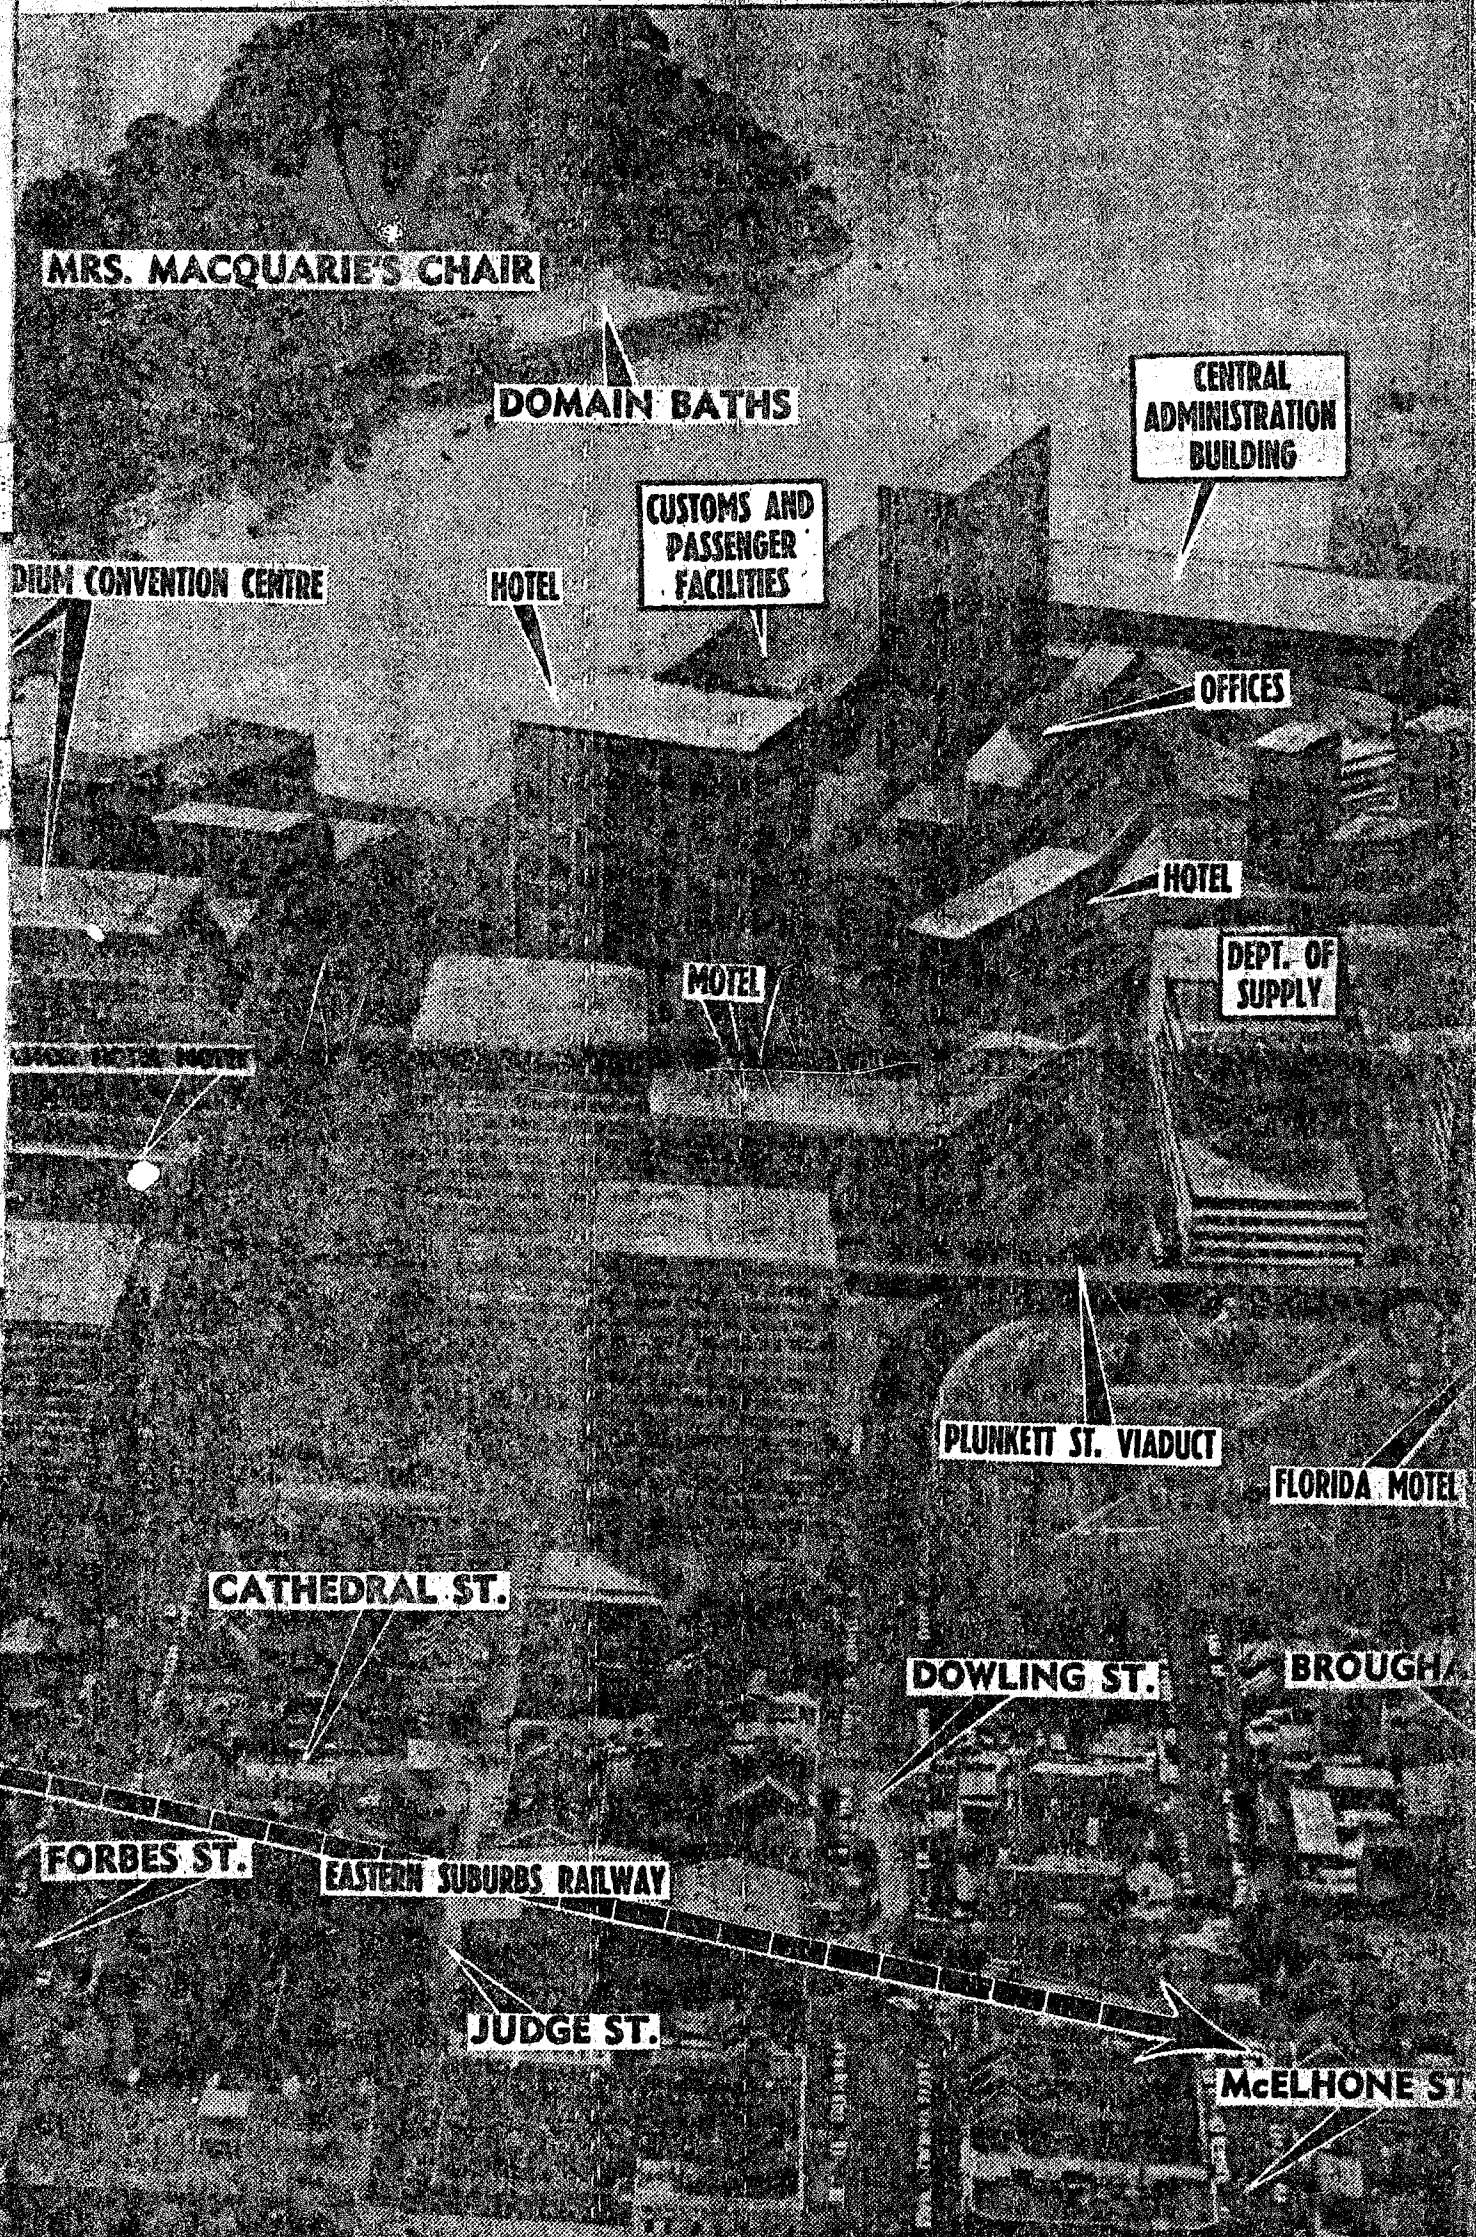

The young male computer programmer riding the monorail to work will be clad in bright form-fitting clothes—reds and yellows, no frills.

He might have come from a satellite city like Mount Sion or Campbelltown—and taken 10 minutes to get to Martin Place.
