Milton,
Qld., 4064

Dear George,

When we first came together I was able to help the planning profession and under your guidance the avenues in which I will contribute were sketched out.

I have asked Andris that when it is convenient in the Brisbane office after May 31'74, I would like to leave Urban Systems for a while so that I may explore some of the above avenues and latter we may come together again.

For your information I enclose a copy of my letter to Andris.

Yours faithfully,

Jonathan Knablich

May 16'74.

Have you noticed how professional development changes ones attitudes and values, particularly those that shed light on ones part in the Gestalt planning process?

Yesterday an opportunity was offered to me which I feel would be wise for me to accept so that both my part in this process and our professional relationship will be strengthened.

When it is convenient with you after May 31'74, I would like to leave Urban Systems for a while.

Because of my personal relationship with George I enclose for you a copy of the letter I wrote him for your information.

When you have read this letter can we discuss the completion of my present work load?

Yours faithfully,

F.
