Founder President **Paul Ritter**, 36 years Ministerial Advisor **Senior Research Fellow Curtin University**  
Hon. Member ACI, MCD.B. Arch., formerly Cr., J.P., Ph.D, Ph.D (Soc.), FRIBA, MRTPI, FRAIA, MRATPI, MACE, DMRPA

Dear Multiple saviour of my soul, you ringing me like that reminds me of A.S. Neill complaining that I only phoned him in his dying days, when only my regret for him, stopped me from going to to see him..... *never him*

George, those forty boxes - I can't finance it, the transport I mean. but if they could be sent here to me, I would look after them till I can transfer them with the rest of my EAI work and archives to Curtin University. That stuff must not be lost. Can you afford to pay for the transport to E.A.L- ~~that's~~ <sup>Perth</sup> me here in Kalamunda, to have jurisdiction over their retention - I might start a George Clark memorial fund, as a charitable institution, if I can't find another way...

I phoned Max Hipkins and am trying to contact Jeremy Dawkins as quickly as I can. - but X mas!

Alas we are under a bit of pressure here. Jean is recovering from a very bad fall, looked as if she'd been run over by a truck... and I have under old <sup>acc</sup>lements for a year or so --but we are v lucky! but to loose you at this time has been a very very saddening blow mightily softened by the 19 pages Jean got for me to show what phantastic things you have achieved in Paddington. I will present this to Curting in the hope we learn something from you. You, I profoundly believe, I have contributed more to Australian Planning than anyone else. Full stop! I will <sup>not</sup> let Australia and the worlds forget that. Pardon me and typewriter both eighty years old. I hope you can hang on with your vitality till my birthday in April! *Ken!*

The deep warmth and appreciation of you will I hope be with you in the days that remain for you to enjoy, resting on your laurels.

We'll evolve into that world we dreamed of in the sixties yet, my science of relating shows how, via the better human being - via social-self-regulation . . . which my kids show works and with new kind of extended family schools we will be able to ~~create these through a social interactional fusion liberation.~~

get love-creation, through sexual attract-fuse-liberating.

To one of my v. best friends. Fred
